About Company

ALLIED is a brand which is synonymous with U.J. Crosses and Propeller Shaft Components since its inception almost-four decades ago. What began as a humble beginning from a small 50 Sq. Yards factory has now flourished into a full - fledged unit with more than 100 employees working day and night to provide our customers the best possible automobile experience.

ALLIED is a brand which is found in every state of the country and also has a significant presence in our neighbouring country, Nepal. We are also exporting our products in Gulf countries and have the ability to manufacture any size of Shaft Components as per sample. With a lot of focus into R&D, we have been able to create a product which is good for the vehicle yet light on the pocket.

Here in ALLIED we develop a standard product for our customer network. We supply our product to some of the biggest brands in the country.

With our experience of around 40 years in this field, it is our humble request to all customers to not use substandard quality products. Propeller Shaft is the main product which enables a successful and smooth transmission of energy from the Gear Box to the Rear Axle which prevents any accidents or mishappening of any sort.
